

1    **Claims**

2    1. A carrying apparatus comprising:

3       a metal basket comprising a bottom and a wall attached to the bottom,  
4       wherein the wall includes an upper edge and a bent connection  
5       extending from the wall to the upper edge; and

6       a metal frame comprising a vertical portion, a first horizontal portion,  
7       a bent connection extending from the vertical portion to the first  
8       horizontal portion, a second horizontal portion, a retroflex connection  
9       extending from the first horizontal portion to the second horizontal  
10      portion, a rolled edge extending from the second horizontal portion,  
11      wherein bent connection of the basket is clamped between the bent  
12      connection and the rolled edge of the frame so that the frame is  
13      secured to the basket.

14   2. The carrying apparatus according to claim 1 wherein the bottom  
15      comprises an edge extending downwards and inwards, and the wall  
16      comprises a lower edge extending inwards, upwards and outwards for  
17      hooking the edge of the bottom.

18   3. The carrying apparatus according to claim 1 wherein the bottom of  
19      the basket is a net.

20   4. The carrying apparatus according to claim 1 wherein the wall of the  
21      basket is a net.
